

Press Release for WMIC 2014

RAPID Biomedical from Rimpar, Germany, specializes in the design and manufacture of proton and multi nuclear RF coils for NMR and MRI. Our product portfolio includes preclinical as well as clinical solutions for research and diagnostic applications. RAPID collaborates with research institutions, hospitals and MR equipment manufacturers worldwide.

As a major development we will present a PET-MR compatible carotid array and show our improved PET-MR compatible 16 channel breast array for human application.

Visit booth # 514 to also see our innovative *miniflex* coil, the *miniflex-array* technology for preclinical applications or visit our homepage www.rapidbiomed.de.

RAPID MR International is our authorized distributor for the United States, Canada, and South America. For more information, please visit their website at www.rapidmri.com.
